

SOLID WASTE MANAGEMENT

The degradable and non-degradable waste is collected in separate bins that are placed at appropriate locations in the campus. Some of the common solid waste includes leftover food, plastic bottles, papers, used out pens, wrappers, dry leaves, twigs etc.

E-waste is a form of discarded surplus; absolute broken electrical or electronic devices that are complex in nature are collected from every department and disposed to the local vendors periodically. The obsolete computer spare parts, switches and hubs are used for demonstration purpose in practical sessions

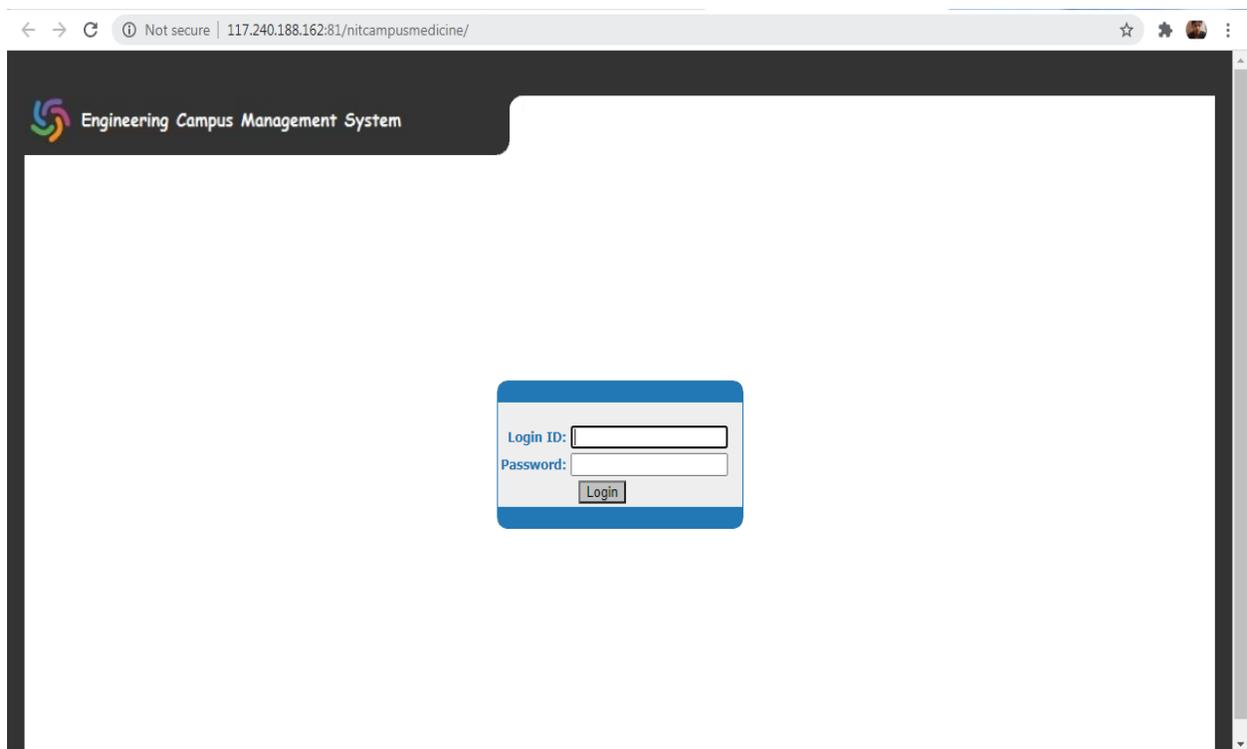

The obsolete computer spare parts are used for demonstration purpose in practical sessions.

PAPER LESS OFFICE

The institution has made a practice of reducing the usage of paper. The formal communication is made through e-mails separate Login ID is provided for Employees, Students & Parents. The Institution uses **Campus Medicine** automation software for academics and administrative activities.

Waste water recycling
Sewage Water Treatment Plant

Sewage water treatment plant is constructed in the campus, which facilitates in removing the waste slurry and the water can be used for gardening purpose.

Water Treatment Plant

The waste water from RO water plant is used for gardening and recharging of ground water.
